India | Open to relocation to Dubai, UAE

Professional Summary

AI FSE specializing in Agentic AI, enterprise AI automation, and data-driven workflow automation. Experienced in developing AI agents for UiPath-to-Playwright test automation migration, source-to-target data mapping and validation, Data Quality rule checking, and Jira-based project reporting. Combines Python, Generative AI, prompt engineering, SQL, Snowflake, Playwright, FastAPI, and REST API skills to automate engineering and quality assurance workflows.

Work Experience

Indium – AI FSE **January 2026 – Present**
Quality Analysis Division

- Successfully developed and demonstrated a **Data Engineering POC Agent comprising four Context Agents**, securing stakeholder approval for project implementation.
- Designed and developed AI agents for enterprise software testing, Data Engineering, Data Quality, and engineering workflow automation.
- Developed agents for **UiPath-to-Playwright framework migration**, supporting manual test-to-script conversion, script-to-manual conversion, failure analysis, and locator maintenance, achieving approximately **90% migration accuracy** across migrated test cases.
- Built Data Engineering agents for source-to-target mapping, SQL/query generation, data reconciliation, and validation between Core and SSOT in Snowflake.
- Developed Data Quality agents and workflows to validate DQ rules, calculate quality metrics, identify mismatches, and produce summary reports.
- Created a Jira AI Agent to automate project tracking, data extraction, and engineering reporting.

Technical Skills

Agentic AI and Generative AI: Agentic AI, AI Agents, Generative AI, Prompt Engineering, AI Automation
AI and Machine Learning: Machine Learning, Deep Learning, NLP, Reinforcement Learning, PyTorch, TensorFlow
Programming: Python, JavaScript, TypeScript, C++, R
Data Engineering: SQL, Snowflake, Source-to-Target Mapping, Data Quality, Data Validation, Data Reconciliation, Power BI, Excel
Test and Workflow Automation: Playwright, UiPath, QA Automation, Test Automation, API Testing, Jira
Backend and Web: FastAPI, REST APIs, React, Next.js, HTML, CSS
Tools and Libraries: Git, GitHub, VS Code, ROS, Whisper, pyannote.audio

Projects

- **Online Shopping Recommendation System:** Developed an AI-powered recommendation system using Python, LLMs, and recommendation techniques.
- **Speaker Diarization and Transcription API:** Developed a FastAPI-based REST service using Whisper and pyannote.audio for speech transcription and multi-speaker diarization.
- **Movie Library Application:** Built a full-stack application using Next.js, React, TypeScript, and JSON with search and movie management functionality.
- **Autonomous Mobile Robot (AMR):** Developed an autonomous mobile robot using ROS, navigation, robotics, and sensor integration.
- **Additional Projects:** COVID-19 Data Analysis, Farmer Prime mobile application, Dialogflow AI Chatbot, and Autoencoder models using MNIST and CIFAR-10.

Education

B.Tech – Artificial Intelligence & Data Science
Kumaraguru College of Technology CGPA: 8.02/10

Higher Secondary Certificate (HSC)
Thamarai International School

Certifications

- Generative AI – Coursera
- Reinforcement Learning – Coursera
- JavaScript, React, FastAPI, SDLC – Udemy
- Power BI – Simplilearn

Languages

English: Fluent **French:** Beginner
